

Third Times the Charm!

Our new scheduling and time clock management software!

Employee Schedule Management

Reach your employees instantly

Only one action is required to send a new or modified schedule to your employees. They'll be notified instantly to their preferred channel of communication. (Mobile, Email and Facebook)

At any time, your employees can access the latest version of their schedule with their mobile phone, tablet or computer. On top of that, Agendrix will indicate when an employee has seen their shifts.

Centralize the availability and leave requests of your employees

Be done with the availability and leave requests puzzle. Your employees can send them directly within Agendrix. As soon as a schedule manager approves a request, the employee will be notified and the changes will be automatically reflected in the schedule.

Reduce absenteeism and lateness

Your employees receive an alert before their shift. You can additionally set Agendrix up to automatically alert employees when they are late and haven't clocked in yet.

Requests

See and manage requests by employees you supervise

Scheduling Confirmation

Read and presence confirmation

See when your employees have checked their most recent schedule update. As needed, you can even enable a presence confirmation option so that your employees have to confirm that they will be present.

Bulletin Board

Interacting with your employees is easier than ever

Use our Bulletin board and stop repeating messages over and over again. Post messages across your entire organization in a snap or cherry pick which positions you want to send the messages to. Add attachments/files to your messages, and much more.

Gps

Gps Time Clock

Define a place and perimeter inside of which your employees must clock in to record their punch in and punch out entries. You can then be sure that they are actually recording their hours from where they actually work.

Name

Main site

Address

779 Paul-Desruisseaux

Online clock in clock out

Your employees clock in from the devices you define

Time and Attendance requires no costly or complex equipment. Based on your preferences, your employees can enter their work hours from their own mobile app, laptop computer, a terminal, or even a client's phone. Native iPhone and Android apps are also available.

Let's Look at Agendrix!
